## VALEN-TIN - FOR YOUR SAFETY

The Loading Dock Protector is a **PATENTED UNIT**, developed as a complete two-way blocking solution for increased safety in the everyday operations of the industrial sector, where lorries need to approach and leave loading ramps.

- 1 **MOTION DETECTION ZONE**. A revolutionary feature that eliminates accidents and deaths in the dangerous area between a lorry / semitrailer and a gate / ramp.
- 2 **TWO-WAY BLOCKING** system, it not only prevents creeping and leaving ramps prematurely but also collision and material damage.
- 3 The **TWO-WAY BLOCKING** system doubles in function by providing theft security as well, making safe keeping of cargo a possibility in streamlining workflow.
- 4 The Loading Dock Protector is **UNIVERSAL**, it fits any type of lorry. And it is the only mechanical two-way unit on the market, solving several issues in one solution.

## LIGHT TOWER

The lorry drivers receive clear signals through the light tower, in guidance of how to proceed when arriving at an available gate / ramp. In connection with a control panel at the ramp, it ensures that the driver can follow the process of the ramp employees' progress and know when it is safe to leave the gate / ramp.

- » **MOTION DETECTION ZONE** - ELIMINATING CRUSHING HAZARD
- » **TWO-WAY BLOCKING** - PROTECTION OF EMPLOYEES, LORRIES AND MATERIAL DAMAGE
- » **ANTI THEFT FUNCTION** - SAFE KEEPING OF CARGO
- » **UNIVERSAL** - FITS ANY TYPE OF LORRY, WITH SENSOR TECHNOLOGY
